EXPERIENCE

UI/UX Designer at Rour Radius

Feb 2025 – Present

- Initiated a project that helped travelers plan and book their journey in a user-friendly and easy way.
- Designed a travel customization user flow within 4 months for a responsive interactive system using Figma and Miro, including sketching, wireframing, prototyping, and user testing.
- Conducted user interviews with 8 participants to iterate on the early design concept, which led to a 29% increase in NPS.
- Managed the project using the Agile development framework to ensure efficient and high-quality delivery within 4 months.

Fullstack Developer at Light Guard GmbH

Aug 2021 – Oct 2022

- Integrated new UI for our interactive system by redesigning the software through 2+ rounds of sketching, wireframing, prototyping and coding.
- Implemented 15% more features for the release version, which was highly appreciated by customers, leading to an 18% increase in sales.
- Designed and developed the primary version of our Wind Assessment tool, which customers can use to plan and visualize their wind products.
- Collaborated with our stakeholders to increase the usability of the interactive system and understand their pain points to create an effective and efficient product.

Software Developer at Reknow GmbH

Jan 2021 – Jul 2021

- Increased website traffic by 20% by contributing to the upcoming release version with a newly updated UI.
- Generated the product's first visibility field analysis report to help users understand the proposed coordinates and potential ISO standard results.
- Improved the retention rate by 22% by collaborating with internal stakeholders to report and fix existing errors.
